Ramset Reseller **Price Review Announcement**

Ongoing global cost increases combined with freight & transport charge increases and a weakened Australian dollar have impacted on many of our raw materials used in locally manufactured product and on imported Ramset products.

We have been working hard with our supply chain partners, including our Australian based manufacturing plant, to contain as many of these increased costs as possible.

We regret to advise however that Ramset are no longer able to absorb these higher input costs.

An average price increase of 8 % across all products will be applied effective Dec 08th, 2008.

Please contact your Ramset representative for further details.

We remain committed to our mission of:

- Developing new and innovative quality products,
- Continuing to provide market leading service levels,
- Providing extensive product training programs,
- Supplying tailored and national promotions.

Thank you for your ongoing support.

Best Regards

Mike Pelman
National Reseller Manager
