April 18, 2008

Dear Customer,

New Prices Effective 1 May 2008

It is well known that the world pricing for Steel Products has risen significantly since the start of the year. Whites Wires has to date, absorbed increases where possible but like others must pass these on as a general price increase. A pricing review has been performed and the attached new pricing will come into effect 1st May, 2008.

Generally, you will find that rises are greatest on products to which the steel content is a high component of the finished costs such as Fence Posts.

Please be aware that volatility in the global steel market is likely to continue as the world experiences a tightening of steel supply in Asia and factors in growth of iron ore and other raw material prices. We strongly suggest that when quoting, you take these factors into account and note that our prices for quantity lots are indicative and will vary according to costs.

Whites Wires has taken moves to ensure we will maintain supply in this difficult period but we expect prices may continue to rise.

Thank you for your support of Whites Wires. Please call us should you have any questions.

Yours Sincerely

Bill Clayton
Queensland Sales Manager

(Pricing may vary, please confirm pricing for any contracts or larger volume purchases, prior to placing orders.)
