PROLNX
Screws with Drive

Why do clients increasingly demand square drive screws?

- **Less wobble** - straight on, straight in.
- **More torque** - means you can really screw them down!
- **Positive drive** - means you can wave your drill around and they will stick on. No more dropped screws!
- **Faster** - means you don't have to waste time fumbling to engage the drive, stop it wobbling, coming out, etc.
- **Aesthetically pleasing** - means it just looks better!
