

April 7th , 2021

Dear Valued Customer,

July 2021 Price Review Notification

Ramset™ is committed to the ongoing supply of innovative and safe engineered product solutions to the construction industry and servicing your business to the highest standard.

As you may be aware, there have been substantial cost increases across the industry including but not limited to; freight, raw materials and labour. As a result, we must advise that we will be increasing our prices.

We do appreciate the need for our customers to remain competitive in a challenging market and have done our best to minimise the level of the increase.

The increase will take effect from 5th July 2021.

The price of our Ramset™ product categories will increase by an average of 6.0%. Please note this is an average and some products will be affected more or less than the stated average. Should you require a full updated product price list, please contact your Account Manager.

If this notification should be shared with additional people within your business, we would greatly appreciate you passing it on or let us know who we need to contact.

Please reach out to your Account Manager or Customer Service Team for more information.

Yours sincerely

Edi Scarini
Business Manager - Ramset
